

RHIC Status

Time Meeting
2/10/2015

Can you tune
around it?

Then said to us: "You can no farther go
Forward upon this crag, because is lying
All shattered, at the bottom, the ~~sixth arch~~.
X-arc.

RHIC Status/To Do List

- Last week
 - Still wrapping up hardware installations
 - Two day interruption for X-arc transformer (some yellow only operation overnight)
 - Spurious RF events
- Rebucketing set up (and beautiful)
- Ramp/rebucket stable to 2.0×10^{11} /bunch
 - Not for collision yet
- Yellow aperture scan looks promising for p-Au

RHIC Status/To Do List

- Delivering stores by default now with scheduled interruption
 - So far only $1.1e11$ /bunch
- Brief no-beam period tomorrow to do final test of e-lens warm magnets.
 - Electron beam commissioning to start this week
- Lumi $\sim 30\%$ of Run 12, polarization in the 60's.
 - Polarization will change with intensity
 - Continue to work on end-of-ramp losses and store lifetime
